DETAILED ACTION

This action is responsive to papers filed on 4/13/2007.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

1. **Claims 1, 2, 6, 7, and 21-48 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jain (U.S. Patent No. 6,993,506).**

Regarding claims 1, 7, 21-29, 31-37, 39-42, 44-46, and 48, Jain teaches sending XML messages containing extended data attributes to a trading partner using an e-commerce portal (GUI) (Column 2, Lines 8-10 and 25-38 and Column 19, Lines 31-43). Since the buyer is receiving information about the supplier, inputting of the data by the supplier (along with data entry screens) is inherent. Further, the extended data attributes must inherently be stored and this storage is considered to be a database. Jain teaches various instances of storing information in databases throughout the document. Jain does not appear to specify the exact arrangement (tables) of the extended data attributes as claimed. However, the arrangement of the data would not affect the steps being taken by the method, which Jain teaches. Official notice is taken that arrangement of data to influence speed is old and well known. Larger amounts of

Art Unit: 3622

data may need to be arranged in a specific format for access speeds to be optimal. It would have been obvious to one having ordinary skill in the art at the time the invention was made to arrange the data using any number or arrangement of tables depending on how fast the data would need to be accessed.

The above claims introduce the specific data content of the data storage (specific data attributes, specific content of tables), it could be argued that while Jain may teach some of this data content, Jain does not teach all of it. However these differences are only found in the nonfunctional descriptive material and are not functionally involved in the method (or structurally programmed) steps recited. The steps would be performed the same regardless of data content. Thus, this descriptive material will not distinguish the claimed invention from the prior art in terms of Patentability, see *In re Gulack*, 703 F.2d 1381, 217 USPQ 401, 404 (Fed. Cir. 1983); *In re Lowry*, 32 F.3d 1579, 32 USPQ2d 1031 (Fed. Cir. 1994). Therefore, it would have been obvious to one of ordinary skill at the time of the invention to have stored any type of data content. Such data content does not functionally relate to the steps and the subjective interpretation of the data content does not patentably distinguish the claimed invention.

Regarding claims 2, 30, 38, 43, and 47, Jain teaches the XML messages as containing references to or values of shopping cart data and product configuration data (this reads on product, pricing, and promotions) (Column 19, Lines 31-43).

Regarding claim 6, Jain teaches the supplier as having a password (Column 5, Lines 9-13). This reads on authorization security measures.

Conclusion

2. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
